

Fatuma Jemal

Public Health Professional | Customer Experience | Data & Operations
+971 50 437 5792 | United Arab Emirates | fatumajemal36@gmail.com

PROFESSIONAL SUMMARY

Public health graduate with a background spanning clinical rotations, overseas worker logistics management in Ethiopia, and customer-facing operations in the UAE. The common thread across these roles has been working in environments where communication gaps create real operational risk, and finding practical ways to close them. Fluent across five languages, which has been more a practical necessity than a formal qualification in the roles held. Currently seeking to bring that mix of health knowledge, data handling, and people experience into a team where operational quality and cross-functional delivery genuinely matter.

CORE SKILLS

Cross-Cultural Communication | CRM & Data Systems | LMIS Data Management | Customer Issue Resolution | Monitoring & Evaluation | Public Health Operations | Multilingual Support | Planning & Coordination | First-Call Resolution | Reporting & Analysis | Team Collaboration | MS Office Suite

PROFESSIONAL EXPERIENCE

Call Centre Specialist & Delighter

Jan 2025 – Jan 2026

Maids.cc | United Arab Emirates

- Served as first point of contact for a high-volume client base, handling everything from routine enquiries to complaints that needed careful de-escalation.
- Focused on first-call resolution, since callbacks indicated something had gone wrong the first time; the goal was always to close issues properly on the first attempt.
- Logged all interactions in the CRM system, feeding into a broader effort to identify recurring friction points and improve the overall service flow.

Manager & LMIS Encoder

Aug 2023 – Jan 2025

Ethiopian Overseas Worker, Taj PLC | Addis Ababa, Ethiopia

- Oversaw day-to-day data operations for overseas worker placement, encoding worker profiles and tracking logistics movements through the LMIS platform.
- Maintained system integrity during a chaotic operational period, which was not straightforward given inconsistent data quality from upstream sources.
- Produced periodic reports for internal planning and strategic decision-making, supporting resource allocation and operational continuity.

Public Health Intern

Jul 2022 – Jul 2023

St. Peter's Specialised Hospital | Addis Ababa, Ethiopia

- Rotated through internal medicine, surgery, obstetrics and paediatrics, gaining hands-on exposure to clinical decision-making under real resource constraints.
- Developed a clearer understanding of where public health interventions land in practice versus how they are framed in theory, particularly in under-resourced settings.
- Supported departmental administration and patient education alongside medical staff, bridging clinical workflows and community health considerations.

Translator & Customer Resolver

Jan 2023 – Jul 2023

Iconic Agency | Ethiopia

- Resolved complex complaints and technical issues across language barriers, translating not just words but the underlying customer concern versus the formal issue on record.

Customer Service & IT Systems Officer

Feb-2018 – Aug 2018

Ethiopian Embassy | Riyadh, Saudi Arabia

- Supported customer service functions and IT system operations in a formal government environment, gaining early exposure to structured, process-driven working practices.

EDUCATION & CERTIFICATIONS

Bachelor of Science in **Public Health** — Sante Medical College, *Addis Ababa, Ethiopia* |
